ABOUT US

Established in 2014, **Ghent Fashions** is a leading garment manufacturer and exporter based in Tirupur, India, delivering high-quality fashion and lifestyle apparel to clients across the globe. With a deep-rooted commitment to craftsmanship, innovation, and customer satisfaction, we have grown from a modest manufacturing unit into a trusted global partner for private labels, fashion retailers and e-commerce brands.

From design development to bulk production, we offer end-to-end solutions tailored to meet dynamic market demands. Our products are crafted with precision, backed by ethical practices and world-class infrastructure.

Integrated Apparel Solutions

- ✓ OEM & ODM Apparel Manufacturing
- ✓ Custom Design & Product Development Support
- ✓ Sampling, Prototyping & Fit Development
- ✓ Private Labelling, Branding & Packaging
- ✓ Flexible MOQs with Scalable Production Capacity
- ✓ Quality Assurance, Inspection & Compliance Documentation
- ✓ Global Logistics & Shipping Coordination

Director's Perspective

P. Gopala Krishnan (Founder)

At Ghent Fashions, our unwavering commitment to quality sets us apart. From meticulous craftsmanship to stringent quality control, we ensure that every product we create meets the highest standards, reflecting our dedication to excellence.

We integrate sustainable practices, responsible sourcing and ethical working conditions into every stage of our operations. Transparency, compliance and accountability from the foundation of our partnerships. Our vision is to build long-term international collaborations based on trust, Excellence and shared growth.

Knitting

Knitting Excellence,
Fashion with Sustainability

Knitting Through Certified Strategic Partners

We collaborate with carefully selected, technically advanced knitting facilities. Our partner units are audited for quality standards, compliance, and sustainability practices. We boast cutting-edge jacquard, flat, and circular machines, ensuring top-notch quality and versatility. From Jersey to rib, we offer a wide range of outputs to meet diverse demands. Our dedicated research unit constantly explores the latest fashion trends, infusing sustainability into our garments. Each knitting program is monitored by our internal quality team to ensure consistency, precision, and timely delivery.

- ✓ Advanced circular & flat knitting machines
- ✓ Capacity planning aligned with buyer schedules
- ✓ Yarn traceability & quality checks
- ✓ Pre-production swatch approval process
- ✓ On-site quality monitoring by our technical team

Dyeing

Dyeing with excellence, preserving our planet

Dyeing Through Certified Processing Partners

We collaborate with carefully selected, environmentally responsible dyeing facilities equipped with modern processing technology. Each partner unit is evaluated for compliance, wastewater treatment capability, and color consistency standards. Our technical and quality team closely monitors every stage — from lab dip approval to bulk production.

- ✓ Lab dip development & buyer shade approval
- ✓ Reactive, disperse & pigment dyeing capabilities
- ✓ AZO-free & REACH-compliant chemicals
- ✓ ETP / ZLD compliant partner units
- ✓ In-line shade & fastness testing
- ✓ Third-party lab testing coordination

Cutting

Smart Precision, Sustainable Production

Cutting

With capacities of more than 55,000 cut pieces per day, our cutting and laying operations combine innovative design and style with the latest CAD systems. At our facility, we strive to deliver exceptional results while maintaining a strong commitment to sustainability and responsible manufacturing practices.

- ✓ Lay Cutting Machine – 6 nos
- ✓ Band Knife – Cut & Fit – 1 no

Printing

Bringing Designs to Life with Sustainable Printing Excellence

Printing Through Specialized Print Partners

We collaborate with technically advanced printing facilities equipped with modern machinery and eco-conscious processing systems. Each partner unit is carefully selected based on quality standards, chemical compliance, and production capability. Our technical team supervises artwork development, strike-offs, and bulk production to ensure precision and consistency.

- ✓ Screen Printing (Manual & Automatic)
- ✓ Digital Printing (DTG / Sublimation)
- ✓ Puff, HD, Foil & Specialty Prints
- ✓ Pantone shade matching
- ✓ AZO-free & REACH-compliant inks
- ✓ Wash & rub fastness testing
- ✓ Pre-production strike-off approval

A woman with long dark hair, wearing a blue surgical mask and light blue gloves, is focused on her work at a multi-head embroidery machine. She is dressed in a vibrant orange saree with a white border. The machine is stitching a colorful floral design onto a red fabric. In the background, other similar machines and a worker in a yellow shirt are visible, indicating a large-scale industrial embroidery facility.

We collaborate with technically advanced embroidery facilities equipped with multi-head computerized machines. Our partner units are selected based on precision capability, capacity, and consistent quality standards.

- ✓ Multi-head computerized embroidery machines
- ✓ Flat, cap & tubular embroidery capabilities
- ✓ Appliqué, sequin & 3D embroidery options
- ✓ High stitch-density precision control
- ✓ Thread shade matching & approval
- ✓ Wash & color fastness testing
- ✓ Pre-production sample approval

Embroidery

Embroidered with sustainability,
Crafted with precision

Garmenting

Seamless Craftsmanship. Superior Quality.

Garmenting

Where Fabric Becomes a Finished Statement

Garmenting is the heart of our operations — and the most critical stage in transforming premium knitted fabrics into world-class apparel.

Our modern production floor is powered by skilled technicians, advanced machinery, and a streamlined workflow that ensures precision at every stitch. From panel alignment to seam strength, from thread consistency to finishing finesse — every detail is meticulously monitored. We follow globally accepted production standards to ensure durability, comfort, and flawless finishing.

With flexible production lines and scalable capacity, we efficiently handle both small curated collections and large-volume orders without compromising quality.

Because at this stage, **Excellence Is Not Added — It Is Engineered.**

Garmenting Infrastructure & Capacity

- ✓ Production Area: 10,100 sq. ft.
- ✓ Monthly Production Capacity: Up to 1,00,000 units
- ✓ Skilled Workforce: 70+ trained and experienced professionals
- ✓ Technology Integration: Advanced CAD/CAM design systems
- ✓ In-House Sampling & Pattern Development
- ✓ High-Precision Stitching Machineries
- ✓ 40 High-Speed Overlock, 16 Flatlock & 25 Single Needle machines from globally recognized brands such as Juki, Siruba & Pegasus.

Checking & Finishing

Where Quality is Confirmed

Every garment undergoes a rigorous multi-stage inspection to ensure precision, durability, and flawless presentation. Our experienced quality controllers verify measurements, stitching accuracy, fabric appearance, and overall workmanship against approved standards.

From thread trimming and steam pressing to final visual audits and retail-ready packing, each piece is meticulously finished to meet buyer specifications.

QUALITY CONTROL

Certified Responsibility. Assured Excellence.

Quality is embedded at every stage of our production process — from raw material inspection to final shipment clearance.

We are proud to operate as a **SMETA 4-Pillar (SEDEX) Audited Facility**, demonstrating our commitment to ethical labour practices, workplace safety, environmental responsibility, and transparent business ethics.

Our dedicated quality team conducts inline inspections, measurement verification, **AQL 2.5** based final audits, and compliance checks to ensure every garment meets buyer specifications and global compliance requirements.

With certified processes and uncompromising standards, we deliver not just products — but trust, integrity, and long-term reliability.

Our Product Strength

Where Style Meets Responsibility

Sustainable product which we can offer :-

- 100% organic cotton
- Organic cotton with Tencel
- Cotton with Recycle Polyester
- Organic cotton with recycle Cotton
- Recycle cotton with Recycle Polyester

Fabrics

Jersey | Pique | Fleece | Jacquards | Ribs | Pointelle | Interlock | Waffle | Terry
Cross Knits | Platted Interlock, etc.

In House Design

Creativity Backed by Technical Precision

Our in-house design team transforms ideas into commercially successful collections. From trend research and concept development to technical specifications and production-ready samples, we offer complete design support under one roof.

With deep understanding of global fashion trends and buyer requirements, we create market-relevant styles tailored to different age groups and target segments. Our team works closely with buyers to develop custom silhouettes, fabric combinations, trims, prints, and finishes that align with brand identity.

Backed by CAD systems and technical expertise, we ensure accurate fit, efficient pattern development, and smooth transition from design to production.

By integrating design with manufacturing, we reduce lead time, improve accuracy, and deliver collections that are both creative and commercially viable.

From concept to creation — we design with purpose.

Commitment to 100% customer satisfaction
